

INFORMATION TO KNOWLEDGE

Make the knowledge in your content accessible

d.velopAI automates routines, unlocks knowledge, and relieves your employees of the tasks that waste time every day.

To do this, **d.velop AI** relies on a secure infrastructure, **authorization structures** that apply to every AI process, and reliable **protection against hallucinations**.

The system is **based exclusively on your own content and sources**. This allows you to use AI productively, with the assurance that data protection, compliance, and control are built in from the start.

European and autonomous.

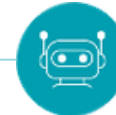

5 FIVE LEVELS

1 ONE AI-PLATFORM

AI Experiences

Ready-to-use AI solutions for data extraction, knowledge search, and automation.

Agents

Autonomous agents that perform recurring tasks independently, reliably, and, if desired, without manual intervention.

Agent Center

The heart of the d.velop content platform: It orchestrates all AI processes, ensures transparency, control, and keeps people actively involved in the loop.

Trust Layer

Permissions, data quality, and protection against hallucinations as an integrated security layer for every AI process.

Global Infrastructure

The technical foundation: unrestricted model selection, MCP-compatible, and conducive to agent-to-agent communication.

One architecture. Five layers. One goal.

Secure, integrated and transparent.

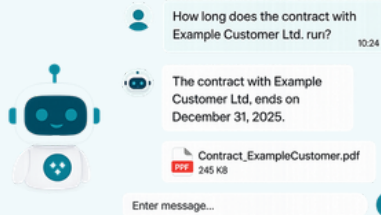

Using AI effectively

Have a greater impact.

Your personal AI assistant

- ✓ Ask complex questions in natural language
- ✓ Find information in seconds
- ✓ Answers based on sources from your documents

Automate processes intelligently

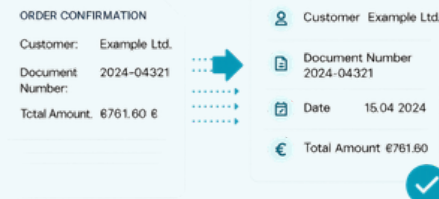

- ✓ Easily automate routines
- ✓ Create forms and scripts using AI
- ✓ Using prompts and agents within processes

coming soon

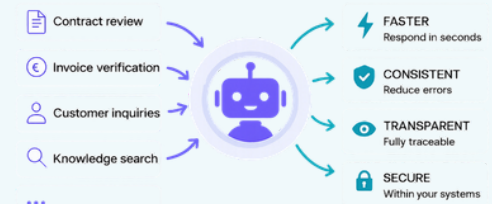

Intelligent document processing

- ✓ Information extraction from documents
- ✓ Automatically categorize and transmit documents.
- ✓ AI-driven identification of inconsistencies and absent information

AI Agents for Everyday Work

- ✓ Outsource tasks to your virtual assistant
- ✓ Increase productivity
- ✓ Decisions made with full transparency

One architecture. Five layers. One goal.

Secure, integrated and transparent.

d.velop AI combines powerful AI solutions that understand your business knowledge, automate processes, and make work noticeably easier - securely, reliably, and seamlessly integrated.
